

LOCALIST FAQs

What is Localist?

Localist helps organizations easily publish, manage and promote their events with a beautifully designed event calendar. Built-in tools such as widgets and social features help you spread the word about your events, activating your audiences to connect.

How do I get an account?

CAS integration is expected to be complete mid-January 2018. Department administrators identified by the Office of University Communications will be given login information at this time.

Will Localist replace my existing calendar?

Localist can support all of your events. It will be the central location for all campus events. Best practice will be to maintain one calendar for discoverability and Search Engine Optimization (SEO) of your events.

How do I integrate Localist into my website?

You can select to add a widget that will show your current events on your site.

How do I get a widget for my website?

If you are an admin, you will use the widget builder within the platform. All other users will use the "Build a widget" link on the calendar homepage. In both cases, Localist will generate an embed code for you to add to your site.

Will my department have its own page?

Yes, if your department or place has been added to the platform, a specific page will be created for it.

Still have questions?

Please contact the Office of University Communications at (951) 827-5246.
